

EER Changes Description

CS 6400 Project Phase 2

1. Change Entity Name address as PostalCodes.
2. For PostalCodes, Postal Code should be an identifier.
3. The relationship between Household and Address change to N to 1
4. Full and Half bathrooms are changed as weak entities.
5. Add Entity Manufacturer. When adding an appliance, the user selects the manufacturer from a populated, updatable list retrieved from the database.
6. Some entities changed to be weak entities. They are Cooker, Refrigerator/freezer, Washer, Dryer, TV, Oven and Cooktop.
7. The Has relationship between Household and Phone changes to be 1 to 1.
8. Change the Crow's foot notation.
9. Changes on the names of entities to make them match eer mapping and sql schema.
